How to use the Remote Desktop on macOS

1. Search in the AppStore for “Remote”

2. You will find the “Microsoft Remote Desktop”

3. Install and open it

4. Click on “Add PC”
5. You have to install two servers
   a. First PC name: “10.10.28.57” for VPN use
   b. Second PC name “RDP-02” for inhouse use

6. After adding both servers you will see this

7. Double Click on one server
8. It will ask you for your credentials  
   a. StudentID@the-klu.org  
   b. Password

9. After Login click on Continue

10. Now you are connected with the RDP
